# Leadership Programme for Sustainable Waste Management (LP-SWM)

# Leadership Programme for Sustainable Waste Management

## Programme Overview

Globally, the waste management industry is increasingly moving from a conventional approach to sustainable and innovative ways of managing waste. With this approach, the industry is becoming a lucrative and revolutionary industry in many countries. However, in Nigeria, there is a dearth of professional training programmes on sustainable and innovative waste management to facilitate the growth of the industry.

The Programme is designed for youths (within the age bracket of 18 to 40 years) working in the waste management industry. This demographic of participants are looking to build business and leadership skills to effectively manage the peculiar technicalities and the business aspects (finance, technology and human resources) in the sector. The programme should also facilitate the entry of informal youth-led waste management businesses into the formal economy in a manner that improves their business reputation and potential for expansion and growth.

**This programme is supported by the Aspire Coronation Trust (ACT) Foundation.**

## Programme Modules

### Modules will include:

- Stepping up to Leadership: Ethics, Profits, and Impact
- Circular Economy and Waste Prevention in the Emerging Markets
- Duty of Care: Waste Legislation, Regulations, and Compliance
- Socio-Environmental Impact in Waste Management
- Managing Waste Projects for Sustainability

## Key Learning Outcomes / Takeaways

- Understand key concepts and principles of sustainable waste management and what a circular economy means for businesses in emerging and developing economies.
- Gain knowledge of relevant regulations/legislation, standard procedures, best practices, ethical and social aspects of waste management in Nigeria.
- Apply business and leadership skills to effectively manage finance, technology and human resources in waste management.
- Examine the complex nature of waste generation, treatment, disposal and monitoring within the value chain.

## Target Audience

### Youth between ages 18 to 40 years

- Entrepreneurs and employees of waste management companies
- Employees of waste handling departments in companies, government departments and nonprofit organisations
- Managers and operators of waste systems
- Sustainability (E&S/CSR) and Health, Safety and Environment (HSE) professionals.
